

**PHILIPP ELMER**  
ENABLING AUTOMIC KNOWLEDGE

## V10 - V12 New Features Power Workshop

### Agenda

Agenda, Day 1 – Automic Web Interface and Custom Attributes

#### **Begin**

Trainer and attendees introduction

Automic Web Interface (AWI)

Introduction, Architecture

Overview

#### **Break**

Automic Web Interface

Personas Concept

Process Monitoring and Process Assembly

#### **Lunch break**

Automic Web Interface

Service Catalog, Dashboards and Administration perspective

Plugins

Setup and Configuration notes

Outlook on future improvements

#### **Break**

AWI Exercise

#### **Break**

New V11 Feature: Custom Attributes

What is it? How to use it.

Exercise

#### **End**

## Agenda, Day 2 – STORE, ext. Interpreters, VARA.EXEC

### **Begin**

General Changes and Enhancements  
in the UserInterface/the AWI  
and under the hood

### **Break**

New V11 Feature: Storage Object  
What is it?  
New Script statement: ATTACH\_RES  
Example Use-Cases  
Security considerations

Exercise

### **Lunch break**

New V11 Feature: Working with External Interpreters  
How is it set up?  
Example Use-Cases  
How does it work

New Script statement: REGISTER\_VARIABLE

### **Break**

Exercise

New V11 Feature: VARA.EXEC  
What is it?  
Example Use-Cases

### **Break**

Working with data sequences  
What are they?  
How are they used?

Exercise

### **End**

## Agenda, Day 3 – VARA.XML, XPath, JOBS.GENERIC, Actions, Adaptive ERT, PERIOD

### **Begin**

New V11 Feature: VARA.XML

What is it?

Example Use-Cases

An introduction to XML and XPath

Working with the XML script statements (there are 22,  
13 of them were introduced in V11)

### **Break**

Exercise

New V11 Feature: JOBS.GENERIC

What is it

Example Use-Cases

### **Lunch break**

An introduction to Actions

What are actions? What kinds of actions exist?

How to install actions?

How to create actions?

Exercise

### **Break**

New V11 Feature: Adaptive Runtime Estimation

How does it work?

How to set it up on system level and on object level

Examples

New V11 Feature: PERIOD

What is it?

Example Use-Cases

### **End**

## Agenda, Day 4 – Analytics, SLM, WCA, CAU, ZDU, Administration related changes

### **Begin**

Analytics V12  
Architecture  
How to work with it  
Sharing Dashboards and sending Reports  
Maintaining the datastore  
The Analytics Action Pack  
Analytics under the hood  
Roadmap / Outlook on future improvements

### **Break**

V12 Service Level Management  
What is it?  
Service Level Objective objects  
Simple and Complex Use-Cases

Excercise

### **Lunch break**

Workflow Completion Acceleration  
What is it  
Demo  
Limitations

Centralized Agent Upgrade  
How does it work?  
Demo

### **Break**

Zero Downtime Upgrade  
How does it work?  
Some important notes for executing a ZDU

Some additional notes about V11 and V12 changes and enhancements  
for AE administrators

Further Resources  
Where you can find more information about product changes

### **End**
